

Application Serial No. 10/526,756  
Reply to Office Action of August 22, 2007

PATENT  
Docket: CU-4104

**Amendments to the Specification**

*Please replace the 4<sup>th</sup> paragraph on page 4 with the following amended paragraph:*

In a preferred embodiment the perforated sheet is arranged having approximately 30 percent of the total area being holes for letting the air through. The area of perforated sheet is preferably around 1.2 square meters, which entail 0.36 square meters of opening. With an air speed of 0.05 meters per second, this will equal a flow of 65 cubic meters per hour.
